

Grand Vision *Perspective*

COMPANY PROFILE

Operations consulting for businesses that have *outgrown* *how they run.*

Grand Vision Perspective is a management and operations consultancy. We diagnose how a business runs today, redesign the processes that have drifted, and oversee implementation through to handover.

PRACTICE

Management and operations
consulting

FOUNDED

2023

BASE

Bali, registered in Indonesia

FEES

Fixed scope, fixed fee, in IDR

FIRST STEP

Free 30-minute strategy call

AUDIT REPORT

Yours to keep

grandvisionperspective.com

connect@grandvisionperspective.com

01

Who we work with

Founder-led businesses that have outgrown the tools and habits they started with.

Founder-led companies where the founder still touches operations.

Operations-heavy businesses where at least one process has drifted and now costs real time.

Growing businesses whose owners have stopped trusting their own numbers.

Teams that want a way of working they own, not a tool they rent.

02

What we do

We work on how the business runs, not only the tools it runs on.

Automation is one method among several, used where it removes repetitive work.

Management and Operations Consulting

Operational audits, process mapping, and a clear redesign of how work moves through the business: sales pipeline, approvals, back office and management reporting.

Strategic Advisory

Roadmaps, priorities and hands-on guidance for founders and operators. We find where friction is costing time and money, and show how to remove it.

Implementation Oversight

A phased implementation plan, coordination with your team and chosen vendors, and automation only where it genuinely removes repetitive steps. Training and documentation included.

03

How an engagement works

STEP ONE

Strategy call

30 minutes, free

We listen, ask the right questions and say plainly whether we can help.

STEP TWO

Operations Audit

Fixed fee, a few days to two weeks

A written report, a recommended scope and a fixed price for implementation. You keep the report.

STEP THREE

Implementation and handover

Fixed price, scoped from the audit

We coordinate the change with your team and vendors, train your people and hand over documentation.

AFTERWARDS

Optional care

Monthly, after handover

A defined scope of cover. 3-month minimum term, then pause or end at the end of any monthly cycle.

Track record

7

Venues opened in a previous role, 21 months end to end.

BEFORE GVP

In a previous role, our founder opened seven UK hospitality venues in 21 months.

HOW

They used a repeatable launch playbook covering recruitment, training, systems, local marketing, launch, and handover.

WHY IT MATTERS HERE

That habit is the starting point for how Grand Vision Perspective looks at operations: write the process down, give each part an owner, and make the next run easier than the last.

Free

The Operations Health Scorecard: eleven questions across five areas, about 3 minutes, no email needed.

Written

Scope and a fixed fee agreed in writing before any work starts. No timesheets.

Yours

You keep the audit report, whatever you decide next.

Personal track record from before Grand Vision Perspective. Not a client project. Client work is confidential: we publish an anonymised case study only after the client approves the draft in writing.

05

How we engage

The commitments behind every engagement.

Confidential by default

A mutual NDA, signed before any audit starts.

Fixed scope, fixed price

The number is in writing before you sign. No timesheets.

Advice, not accounting

Bookkeeping and tax stay with your own accountant.

Anonymised work

We never name clients or show their logos.

You keep the report

Whether or not you continue with us.

Method before tools

We map the work first. Software comes after, if at all.

06

From the founder

Our founder started Grand Vision Perspective after years of hands-on operations work. Again and again the same pattern showed up: broken systems putting unnecessary pressure on good people. The practice exists to fix that, combining international strategic experience with local operational knowledge from its base in Bali.

Founder and Principal Consultant

Talk to us about how your business runs.

Start with a free 30-minute strategy call. If there is a fit, the next step is an Operations Audit with a fixed scope and fee.
